

ЕЛЕКТРОЛУКС Electrolux

Miscellaneous Heaters

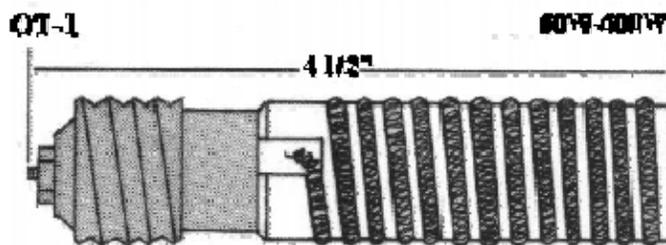

Cabinet Heater Features

- | The Electrolux Macedonia Cabinet Heater is used primarily as a dehumidifier.
- | These heaters are often used to keep stored tools, dies, and gauges free from rust as well as to keep many hygroscopic materials from absorbing harmful moisture.
- | The heater is available in different wattages and voltages.
- | Most Cabinet Heaters are supplied with a standard screw base, but may be supplied with a three-prong grounded plug or twist lock connection.

Open Coil Features

- | These heaters are used as resistors, radiant heaters or air heaters.
- | The heater is available in different wattages and voltages.
- | The heater is supplied with a standard screw base.

Ceramic Plate Heater Features

- | The Ceramic Plate Heater is made of the highest quality refractory ceramic with heating coils of nickel chrome resistance wire.
- | These heaters are supplied with leads.
- | Available in various wattages and voltages.

ЕЛЕКТРОЛУКС Electrolux

- Heaters may be supplied with exposed resistance element or refractory cement filled.

PH3: 3-1/8 O.D. 100W-300W
