

# Teach pendant CDSA

FESTO

Reduce your “time to application” for system solutions in handling technology with the unique combination of the multi-axis control CMXR and the teach pendant CDSA. For more efficiency when programming, during operation and for application diagnostics, thanks to the intuitive, graphical and dialogue-based software.

#### Easier programming

The multi-axis control CMXR and teach pendant use work in the clear text-based macro language of Festo Teach-Language (FTL). With the CDSA, even complex applications are easy to program. Teach-in function is included.

#### Faster adaptation

The time required for individual programming steps is minimal and the variable monitor supports users when setting freely definable variables. Users can concentrate fully on their applications.

#### Easier grip

Thanks to its ergonomic shape the teach pendant fits comfortably, whether in the left or the right hand.

#### Secure access and reliable diagnostics

Via the integrated user administration, access authorisation can be created and defined. The integrated alarm system and the signal monitor facilitate error message diagnostics and peripheral signal monitoring.

Product Short Information

# Teach pendant CDSA

## Front view

## Rear view

## Simple adaptation

Positions can be copied or changed at the touch of a few buttons and the application is immediately ready for use.

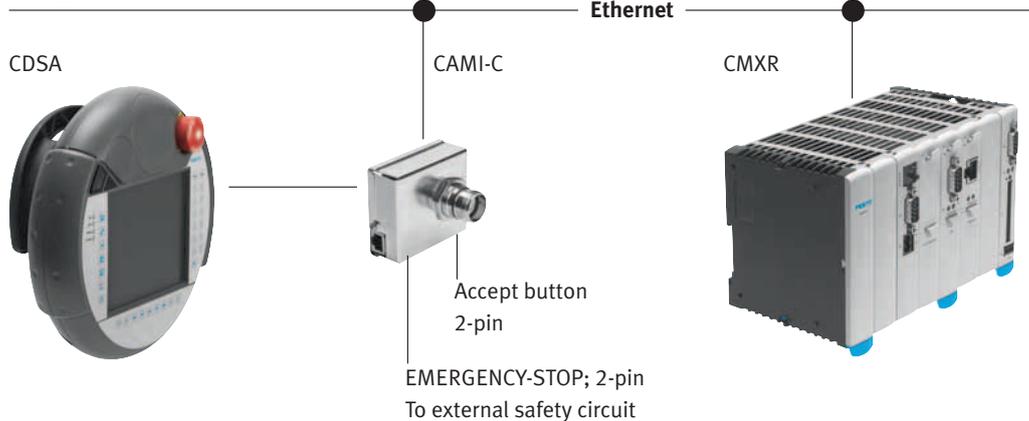

## Reliable set-up

The axes can be moved manually via the keypad for reliable system teach-in and set-up.

## Ergonomics

The operating elements for the most important actions are arranged so that they can be controlled quickly and simply using the keypad or the touch screen.

## The system

## Accessories

Type designation	Description
NESC-C-D1-5-C1	Fully assembled connecting cable, 5 m length
NESC-C-D1-10-C1	Fully assembled connecting cable, 10 m length
NESC-C-D1-15-C1	Fully assembled connecting cable, 15 m length
CAMI-C	Interface unit
NECC-L1G11-C1	11-pin socket strip for interface unit
CAMF-B-M25-G4	Strapping plug for interface unit
CAFM-D1-W	Wall bracket with tray for cable
