

## Mica Band Heaters

**2 Piece Construction-** Ease of installation in difficult locations. Recommended for diameters larger than 15".

**Expandable or Hinged-** One piece construction used where heater cannot be slid over the barrel or die. Two sets of terminals required. All terminations available

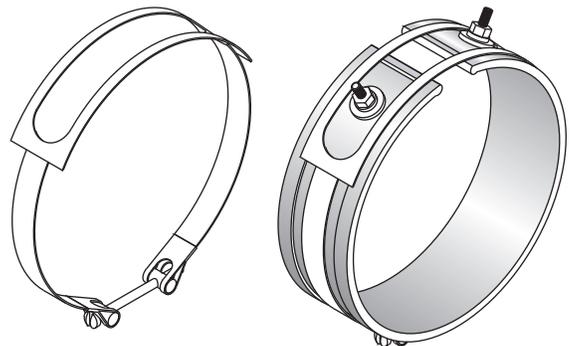

**Holes and Cutouts-** Allow for installation of thermocouples and transducers and give clearance for mounting bolts.

**Built-in Strap-** Barrel nuts provide secure and strong clamping. Also available in spring loaded designs for larger diameters

**Bent Up Flange-** Available with any termination style and is only recommended for narrower designs.

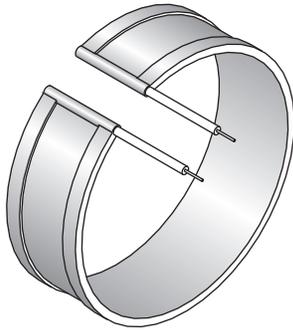

**Separate Strap-** Available in all sizes and configurations. Built-in straps are recommended wherever possible. Typically used in smaller diameters.

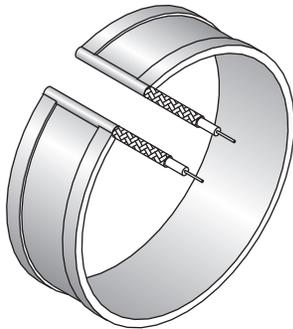

## Mica Band Heaters

**W1**

**Nozzle Style-** Fiberglass leads 12" long is standard

**W2**

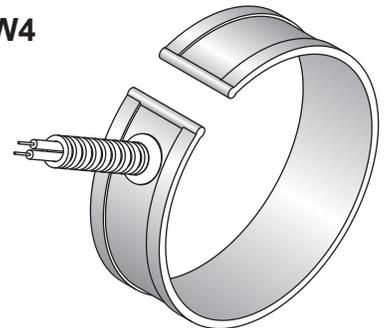

**Nozzle Style-** Fiberglass leads with metal overbraid 12" long is standard

**W3**

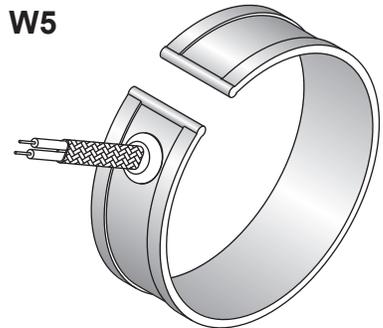

**Fiberglass Leads with Metal Braid-** Exiting from the edge at 180 degrees from the gap

**W4**

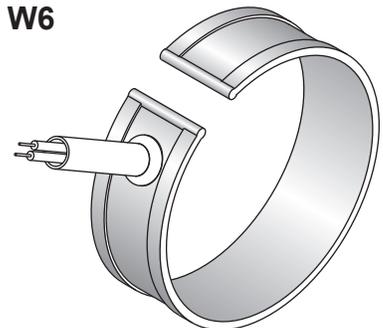

**Fiberglass Leads with Armor Cable-** Specify location and length of leads at time of order.

**W5**

**Fiberglass Leads with Metal Braid-** Specify location and length of leads at time of order.

**W6**

**Fiberglass Leads with Protective Sleeve-** Specify location and length of leads at time of order.

## Mica Band Heaters

**T1**

**10-32 Threaded Terminals-** Minimum width required 7/8"

**T2**

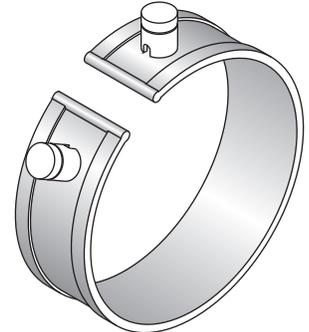

**10-32 Threaded Terminals-** Minimum width required 7/8"- Specify location at time of order

**T3**

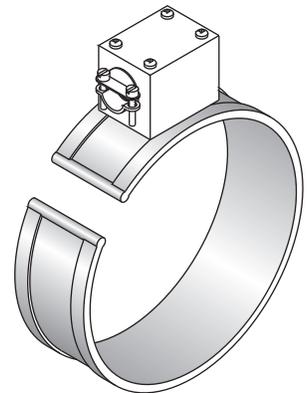

**10-32 Threaded Terminals-** Minimum width required 2.00"-Specify location at time of order

**CTP**

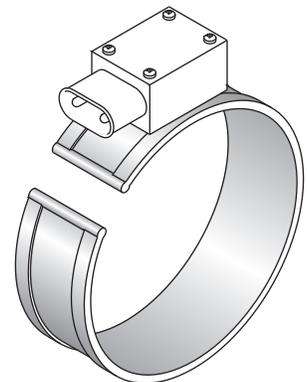

**Ceramic Terminal Covers-** Available on all threaded terminals. Covers available separately

**TB**

**Sheet Metal Terminal Box-** Available with T2 and T3 threaded terminals.

**EP**

**90 Degree European Plug-** Also available straight out- Specify location at time of order
